Patrick Keegan, Colorado Energy Science Center  
Roy Turner, CWPMA

A Request for Support (RFS) application process was discussed by the Coalition to make the application for support as straightforward as possible. The funding matrix, a Request for Support template, and a cover letter will all be included in the RFS packet. E85 Coalition members will send out these documents to interested parties. Once a RFS is completed, the Coalition will do additional follow-up on FFV's, etc. at the potential site location. A meeting or phone call will ensue and lastly, a visit to the site.

The Coalition's education subcommittee discussed their efforts for preparing for the promotion of the Hill Petroleum Grand Opening E85 Station event. Education materials are being prepared for the event and a press release will be sent out prior to the event. In addition, the Colorado Corn Growers Association will be providing educational E85 literature for distribution and Hiro Futakami, Staff Applications Engineer at Marvell, donated E85 bumper stickers to the Coalition.

A Request for Support from Agland, located in Greeley, was discussed among the Coalition members. Agland wants to add a new E85 tank and 2 hoses to its existing Cenex station in Greeley. Also, Roger Guzman, Guzman Enterprises, discussed his intent in submitting a Request for Support from the Coalition for E85 pump conversions at his station. The Request for Support (RFS) will be considered by the Coalition at the next E85 meeting in September.

The Coalition has decided to meet on the 4<sup>th</sup> Thursday of every month. The next meeting will be held September 28 from 10 a.m. to Noon at OEMC. OEMC is located at 225 E. 16th Avenue, Ste. 650 in Denver, CO, 80206.
